HISTORY OF THE COLLEGE

South Piedmont is North Carolina's newest community college, having been created in 1999 by the North Carolina General Assembly. The legislature's action abolished Anson Community College and assigned the new college's service area as Anson and Union counties in south-central North Carolina.

South Piedmont is in the unique position of being a new institution with a proud history. The institution traces its roots to 1962, with the founding of the Ansonville unit of the Charlotte Industrial Education Center. In collaboration with Stanly Community College, it also provided years of service in Union County as Union Technical Education Center.

The institution was originally designated as the Ansonville Industrial Education Center in November 1962 by action of the State Department of Public Instruction. On December 2, 1967, the Anson County Board of Education and County Commissioners officially appointed a local Board of Trustees. As a result, the Ansonville Industrial Education Center became Anson Technical Institute, a unit of the Department of Community Colleges of North Carolina.

Further progress, larger enrollment, and additional support from the community, especially Polkton Mayor W. Cliff Martin, enabled Anson Technical Institute to acquire land, obtain additional funds, and complete construction of a 28,000-square-foot building in Polkton in 1977. To better reflect the offerings of the institution, the Board of Trustees on June 7, 1979, changed the name to Anson Technical College.

In 1981, Union Technical Education Consortium was created when Central Piedmont Community College voluntarily withdrew from Union County and the North Carolina Department of Community Colleges authorized service in the county by a consortium of Anson and Stanly community colleges.

Effective November 1, 1987, the official name of Anson Technical College was changed to Anson Community College.

On May 19, 1999, Gov. Jim Hunt signed a bill, based upon recommendations of an independent study team, that abolished Anson Community College and Union Technical Education Center and created North Carolina's newest community college. The signing of this bill created a single college with two campuses, one in Anson County and one in Union County, to serve the residents of both counties, and a new 14-member Board of Trustees was appointed.

The new college was named South Piedmont Community College on August 3, 1999, using one of the 441 different names suggested during a contest held during July.

South Piedmont expanded its operations, adding new buildings at the L. L. Polk Campus in Polkton, adding a new campus at Old Charlotte Highway, Monroe, and opening the Lockhart-Taylor Center in Wadesboro. The Center for Technology and Health Education was opened at the Old Charlotte Highway Campus in 2013.

New programs continue to be added to the College's offerings, and enrollment has continued to grow. In fall 2014, credit programs served 2,647 students, continuing education (non-credit) programs served 3,929, and adult literacy programs enrolled 1,485.

CORE SKILLS AND LEARNING OUTCOMES

South Piedmont Community College advocates Thinking, Learning, and Interacting as critical competencies for student achievement and lifelong learning in today's global economy. These critical competencies will be supported by six (6) core skills with identified measurable learning outcomes and integrated into the Learning College's instruction and activities.

To ensure the attainment of these core skills, South Piedmont Community College has established the following Core Skills Learning Outcomes:

Written Communication

- The learner will organize and express ideas clearly through written communication in a manner appropriate for the intended audience.

Oral Communication

- The learner will organize and express ideas clearly through oral communication in a manner appropriate for the intended audience.

Intercultural Competence

- The learner will develop awareness, knowledge, and behaviors necessary for intercultural competence.

Technology

- The learner will choose and utilize appropriate technologies to access, organize, analyze, and communicate information.

Analysis and Interpretation

- The learner will apply the basic principles of interpretation and analysis to synthesize information.

Problem Solving

- The learner will apply the basic principles of mathematics and/or scientific inquiry to identify, interpret, evaluate, and solve problems.

OUTCOMES AND ASSESSMENT

At SPCC, all students participate in the outcomes assessment process. This process helps answer the fundamental learning college question: Are you, as a student, learning? How do we, as an institution, and you, as a student, know? All curriculum programs at SPCC, from the Associate in Arts to Medical Assisting, have program outcomes, course learning outcomes, and core skill outcomes which are assessed.

Program Outcomes answer the question, "What should graduates of this program be able to do?" Program Outcome statements focus on the big picture. All programs have outcomes that are unique to that program. Contact your program advisor to see what will be learned in your program of choice.

Course Learning Outcomes are statements that describe what learning is expected in a course. These outcomes are found in course syllabi and state the knowledge, skills, or abilities students will gain upon successful course completion. SPCC's six (6) Core Skill Outcomes are assessed in every degree program, usually within general education courses.

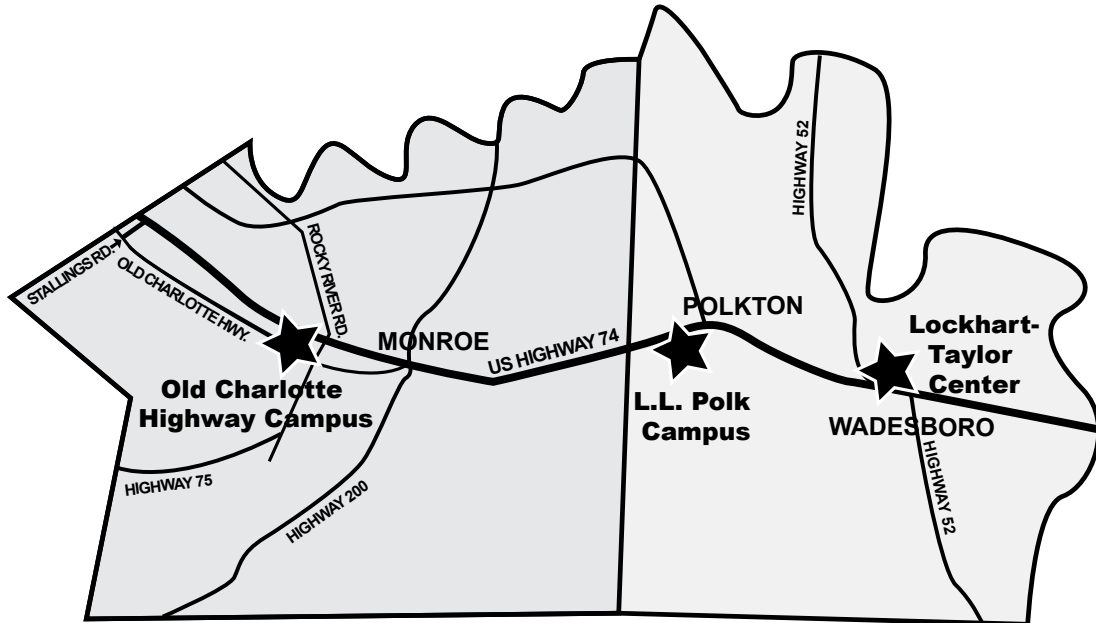

Results of all assessments are analyzed by instructors to determine what students know and how learning can be improved. The College reserves the right to share samples of student work with regulatory and accrediting bodies.

Decisions about continuous improvement in learning are made in a systematic way using the data from the assessments submitted in TaskStream, the College's online assessment management system.
